Dan started working freelance as a web designer and software Engineer in 2014. Continuing his freelance work on the side he received first-class honours studying Interaction Design Arts at the London College of communication. Using his software background he developed a multidisciplinary practice that led him to build interactive installations for the London Science Museum. More recently he was involved in running a successful crowdfunding campaign for a documentary film on climate change, and building and designing Lectures.london a platform listing all the free open to the public lectures held in London.

### Skills

- software Professional experience with javascript and nodeJS, however, I have experimented with many other languages such as Haskell, Scala and python. I have extensive experience with libraries/protocols/frameworks such as ReactJS, Redux, ExpressJS, GraphQL, Relay.
- design I have been using software such as Adobe Photoshop, Adobe Illustrator and Adobe Indesign for over 10 years.
- film Through filming and editing a number of films I have a solid understanding of Adobe After Effects, Adobe Premier Pro.
